ENDANGERED WILDLIFE PRESERVE

ABOUT US

Tiger World® Endangered Wildlife Preserve is a non-profit animal conservation and educational center dedicated to rescue, rehabilitation, and preservation of exotic animals.

Tiger World® is a different kind of Zoo. Our educational tours personally guide visitors throughout the preserve learning about each animal while providing an individual hands on experience. You'll see the animals in a natural setting and have the opportunity to observe them running, playing, swimming, sleeping, eating, and interacting with their handlers.

Our goal is to provide the best environment in captivity for the animals while also offering a stimulating learning environment for visitors. The intimate setting is a great place to bring the family and experience the animals up close and personal.

Tiger World® is a registered 501(c)(3) non-profit public charity. We depend entirely on visitors, season pass holders, animal adoptions, and tax-deductible donations for funding. Public support is critical to our future. Please help and donate now.

GOALS

EDUCATION - To provide a stimulating learning environment for generations to come. Education is the key to the development of our children. We feel that wildlife and nature sparks the imagination. Tiger World® exhibits animals but also gives the people an understanding of endangered wildlife with guided educational tours and a hands on approach to learning.

CONSERVATION & PRESERVATION - To promote awareness about the Endangered and Threatened Species of the world. Our wildlife numbers are decreasing at an alarming rate in their native habitats. In 1978 tigers were added to the Endangered Species List. Worldwide, tiger populations have dropped by 98% since 1900 when there were over 100,000 tigers in Asia. The demise of animal populations is due to man. One person can make a world of difference in the choices they make; not buying certain products could conserve our animals and ecosystem.

PROTECTION & SAFETY - To maintain a safe secure preserve for the public and endangered wildlife. Unfortunately reserves in other countries, like Africa and India, are not safe. Poaching, Illegal Trade, and Habitat Destruction are just some of the problems reserves face today. Our facility exists because we need to protect these animals. Zoos and private facilities have provided assistance to responsible genetically diverse breeding programs that will help bring animals back from the brink of extinction. This is why Tiger World® was created.
